## TITLE IV—REPEAL AND CONFORMING AMENDMENTS

Sec. 401. Repeal.

1 **SEC. 2. FINDINGS AND PURPOSES.**

2 (a) FINDINGS.—Congress finds the following:

3 (1) Disability is a natural part of the human  
4 experience and in no way diminishes the right of in-  
5 dividuals to—

6 (A) live independently;

7 (B) enjoy self-determination and make  
8 choices;

9 (C) benefit from an education;

10 (D) pursue meaningful careers; and

11 (E) enjoy full inclusion and integration in  
12 the economic, political, social, cultural, and edu-  
13 cational mainstream of society in the United  
14 States.

15 (2) Technology has become 1 of the primary en-  
16 gines for economic activity, education, and innova-  
17 tion in the Nation, and throughout the world. The  
18 commitment of the United States to the development  
19 and utilization of technology is 1 of the main factors  
20 underlying the strength and vibrancy of the economy  
21 of the United States.

22 (3) As technology has come to play an increas-  
23 ingly important role in the lives of all persons in the  
24 United States, in the conduct of business, in the

1 functioning of government, in the fostering of com-  
2 munication, in the conduct of commerce, and in the  
3 provision of education, its impact upon the lives of  
4 the more than 50,000,000 individuals with disabil-  
5 ities in the United States has been comparable to its  
6 impact upon the remainder of the citizens of the  
7 United States. Any development in mainstream tech-  
8 nology would have profound implications for individ-  
9 uals with disabilities in the United States.

10 (4) Substantial progress has been made in the  
11 development of assistive technology devices, includ-  
12 ing adaptations to existing devices that facilitate ac-  
13 tivities of daily living, that significantly benefit indi-  
14 viduals with disabilities of all ages. Such devices and  
15 adaptations increase the involvement of such individ-  
16 uals in, and reduce expenditures associated with,  
17 programs and activities such as early intervention,  
18 education, rehabilitation and training, employment,  
19 residential living, independent living, and recreation  
20 programs and activities, and other aspects of daily  
21 living.

22 (5) All States have comprehensive statewide  
23 programs of technology-related assistance. Federal  
24 support for such programs should continue,  
25 strengthening the capacity of each State to assist in-

1 individuals with disabilities of all ages with their as-  
2 sistive technology needs.

3 (6) Notwithstanding the efforts of such State  
4 programs, there is still a lack of—

5 (A) resources to pay for assistive tech-  
6 nology devices and assistive technology services;

7 (B) trained personnel to assist individuals  
8 with disabilities to use such devices and serv-  
9 ices;

10 (C) information among targeted individuals  
11 about the availability and potential benefit of  
12 technology for individuals with disabilities;

13 (D) outreach to underrepresented popu-  
14 lations and rural populations;

15 (E) systems that ensure timely acquisition  
16 and delivery of assistive technology devices and  
17 assistive technology services;

18 (F) coordination among State human serv-  
19 ices programs, and between such programs and  
20 private entities, particularly with respect to  
21 transitions between such programs and entities;  
22 and

23 (G) capacity in such programs to provide  
24 the necessary technology-related assistance.

1           (7) In the current technological environment,  
2           the line of demarcation between assistive technology  
3           and mainstream technology is becoming ever more  
4           difficult to draw.

5           (8) Many individuals with disabilities cannot ac-  
6           cess existing telecommunications and information  
7           technologies and are at risk of not being able to ac-  
8           cess developing technologies. The failure of Federal  
9           and State governments, hardware manufacturers,  
10          software designers, information systems managers,  
11          and telecommunications service providers to account  
12          for the specific needs of individuals with disabilities  
13          in the design, manufacture, and procurement of tele-  
14          communications and information technologies results  
15          in the exclusion of such individuals from the use of  
16          telecommunications and information technologies  
17          and results in unnecessary costs associated with the  
18          retrofitting of devices and product systems.

19          (9) There are insufficient incentives for Federal  
20          contractors and other manufacturers of technology  
21          to address the application of technology advances to  
22          meet the needs of individuals with disabilities of all  
23          ages for assistive technology devices and assistive  
24          technology services.

1           (10) The use of universal design principles re-  
2       duces the need for many specific kinds of assistive  
3       technology devices and assistive technology services  
4       by building in accommodations for individuals with  
5       disabilities before rather than after production. The  
6       use of universal design principles also increases the  
7       likelihood that products (including services) will be  
8       compatible with existing assistive technologies. These  
9       principles are increasingly important to enhance ac-  
10      cess to information technology, telecommunications,  
11      transportation, physical structures, and consumer  
12      products. There are insufficient incentives for com-  
13      mercial manufacturers to incorporate universal de-  
14      sign principles into the design and manufacturing of  
15      technology products, including devices of daily living,  
16      that could expand their immediate use by individuals  
17      with disabilities of all ages.

18           (11) There are insufficient incentives for com-  
19      mercial pursuit of the application of technology de-  
20      vices to meet the needs of individuals with disabili-  
21      ties, because of the perception that such individuals  
22      constitute a limited market.

23           (12) At the Federal level, the Federal Labora-  
24      tories, the National Aeronautics and Space Adminis-  
25      tration, and other similar entities do not recognize

1 the value of, or commit resources on an ongoing  
 2 basis to, technology transfer initiatives that would  
 3 benefit, and especially increase the independence of,  
 4 individuals with disabilities.

5 (13) At the Federal level, there is a lack of co-  
 6 ordination among agencies that provide or pay for  
 7 the provision of assistive technology devices and as-  
 8 sistive technology services. In addition, the Federal  
 9 Government does not provide adequate assistance  
 10 and information with respect to the quality and use  
 11 of assistive technology devices and assistive tech-  
 12 nology services to targeted individuals.

13 (14) There are changes in the delivery of assist-  
 14 ive technology devices and assistive technology serv-  
 15 ices, including—

16 (A) the impact of the increased prevalence  
 17 of managed care entities as payors for assistive  
 18 technology devices and assistive technology  
 19 services;

20 (B) an increased focus on universal design;

21 (C) the increased importance of assistive  
 22 technology in employment, as more individuals  
 23 with disabilities move from public assistance to  
 24 work through training and on-the-job accom-  
 25 modations;

1           ~~(D)~~ the role and impact that new tech-  
2           nologies have on how individuals with disabil-  
3           ities will learn about, access, and participate in  
4           programs or services that will affect their lives;  
5           and

6           ~~(E)~~ the increased role that telecommuni-  
7           cations play in education, employment, health  
8           care, and social activities.

9           ~~(b)~~ PURPOSES.—The purposes of this Act are—

10           ~~(1)~~ to provide financial assistance to States to  
11           undertake activities that assist each State in main-  
12           taining and strengthening a permanent comprehen-  
13           sive statewide program of technology-related assist-  
14           ance, for individuals with disabilities of all ages, that  
15           is designed to—

16           ~~(A)~~ increase the availability of, funding  
17           for, access to, and provision of, assistive tech-  
18           nology devices and assistive technology services;

19           ~~(B)~~ increase the active involvement of indi-  
20           viduals with disabilities and their family mem-  
21           bers, guardians, advocates, and authorized rep-  
22           resentatives, in the maintenance, improvement,  
23           and evaluation of such a program;

24           ~~(C)~~ increase the involvement of individuals  
25           with disabilities and, if appropriate, their family

1 members, guardians, advocates, and authorized  
2 representatives, in decisions related to the pro-  
3 vision of assistive technology devices and assist-  
4 ive technology services;

5 (D) increase the provision of outreach to  
6 underrepresented populations and rural popu-  
7 lations; to enable the 2 populations to enjoy the  
8 benefits of activities carried out under this Act  
9 to the same extent as other populations;

10 (E) increase and promote coordination  
11 among State agencies; between State and local  
12 agencies; among local agencies; and between  
13 State and local agencies and private entities  
14 (such as managed care providers); that are in-  
15 volved or are eligible to be involved in carrying  
16 out activities under this Act;

17 (F)(i) increase the awareness of laws, reg-  
18 ulations, policies, practices, procedures, and or-  
19 ganizational structures; that facilitate the avail-  
20 ability or provision of assistive technology de-  
21 vices and assistive technology services; and

22 (ii) facilitate the change of laws, regula-  
23 tions, policies, practices, procedures, and orga-  
24 nizational structures; to obtain increased avail-

1 ability or provision of assistive technology de-  
2 vices and assistive technology services;

3 (G) increase the probability that individ-  
4 uals with disabilities of all ages will, to the ex-  
5 tent appropriate, be able to secure and main-  
6 tain possession of assistive technology devices  
7 as such individuals make the transition between  
8 services offered by human service agencies or  
9 between settings of daily living (for example,  
10 between home and work);

11 (H) enhance the skills and competencies of  
12 individuals involved in providing assistive tech-  
13 nology devices and assistive technology services;

14 (I) increase awareness and knowledge of  
15 the benefits of assistive technology devices and  
16 assistive technology services among targeted in-  
17 dividuals;

18 (J) increase the awareness of the needs of  
19 individuals with disabilities of all ages for as-  
20 sistive technology devices and for assistive tech-  
21 nology services; and

22 (K) increase the capacity of public agencies  
23 and private entities to provide and pay for as-  
24 sistive technology devices and assistive tech-

1           nology services on a statewide basis for individ-  
2           uals with disabilities of all ages;

3           ~~(2)~~ to identify Federal policies that facilitate  
4           payment for assistive technology devices and assist-  
5           ive technology services; to identify those Federal  
6           policies that impede such payment, and to eliminate  
7           inappropriate barriers to such payment; and

8           ~~(3)~~ to enhance the ability of the Federal Gov-  
9           ernment to—

10           ~~(A)~~ provide States with financial assistance  
11           that supports—

12                   ~~(i)~~ information and public awareness  
13                   programs relating to the provision of as-  
14                   sistive technology devices and assistive  
15                   technology services;

16                   ~~(ii)~~ improved interagency and public-  
17                   private coordination, especially through  
18                   new and improved policies; that result in  
19                   increased availability of assistive tech-  
20                   nology devices and assistive technology  
21                   services; and

22                   ~~(iii)~~ technical assistance and training  
23                   in the provision or use of assistive tech-  
24                   nology devices and assistive technology  
25                   services; and

1           (B) fund national, regional, State, and  
 2           local targeted initiatives that promote under-  
 3           standing of and access to assistive technology  
 4           devices and assistive technology services for tar-  
 5           geted individuals.

9       ly available to all individuals with disabilities resid-  
10      ing in the State, regardless of their type of disabil-  
11      ity, age, income level, or location of residence in the

19 the allotments of the remaining systems within  
20 States under paragraph (3), with such adjustments  
21 as may be necessary to prevent the allotment of any  
22 such remaining system within a State from being re-  
23 duced to less than the minimum allotment for a sys-  
24 tem within a State (as increased under paragraph  
25 (4)) under paragraph (3)(B).

1           (6) REALLOTMENT.—Whenever the Secretary  
 2           determines that any amount of an allotment under  
 3           paragraph (3) to a system within a State for any fis-

 7           out the provisions of this section to 1 or more of the  
 8           systems that the Secretary determines will be able to

 16          this Act; and

17          (5) coordinating activities with protection and  
 18          advocacy services funded through sources other than  
 19          this title; and coordinating activities with the capac-  
 20          ity building and advocacy activities carried out by  
 21          the lead agency or State Assistive Technology Office;  
 22          as appropriate.

23          (d) REPORTS AND UPDATES TO STATE AGENCIES.—  
 24          An entity that receives a grant under this section shall

5 mation on—

6           (1) the number of grant applications received  
7           and approved by the Secretary under this title; and  
8           the amount of each grant awarded under this title;

9           (2) the ratio of funds provided by each State  
10          for the alternative financing program of the State to  
11          funds provided by the Federal Government for the  
12          program;

13          (3) the type of alternative financing mecha-  
14          nisms used by each State and the community-based  
15          organization with which each State entered into a  
16          contract, under the program; and

17          (4) the amount of assistance given to consum-  
18          ers through the program (who shall be classified by

**1 SEC. 2. FINDINGS AND PURPOSES.**

**2**        *(a) FINDINGS.—Congress finds the following:*

**3**               *(1) Disability is a natural part of the human ex-*

**4**        *perience and in no way diminishes the right of indi-*

**5**        *viduals to—*

1                   (A) live independently;

2                   (B) enjoy self-determination and make  
3 choices;

4                   (C) benefit from an education;

5                   (D) pursue meaningful careers; and

6                   (E) enjoy full inclusion and integration in  
7 the economic, political, social, cultural, and edu-  
8 cational mainstream of society in the United  
9 States.

10           (2) Technology has become 1 of the primary en-  
11 gines for economic activity, education, and innova-  
12 tion in the Nation, and throughout the world. The  
13 commitment of the United States to the development  
14 and utilization of technology is 1 of the main factors  
15 underlying the strength and vibrancy of the economy  
16 of the United States.

17           (3) As technology has come to play an increas-  
18 ingly important role in the lives of all persons in the  
19 United States, in the conduct of business, in the func-  
20 tioning of government, in the fostering of communica-  
21 tion, in the conduct of commerce, and in the provi-  
22 sion of education, its impact upon the lives of the  
23 more than 50,000,000 individuals with disabilities in  
24 the United States has been comparable to its impact  
25 upon the remainder of the citizens of the United

1     *States. Any development in mainstream technology*  
2     *would have profound implications for individuals*  
3     *with disabilities in the United States.*

4             *(4) Substantial progress has been made in the*  
5     *development of assistive technology devices, including*  
6     *adaptations to existing devices that facilitate activi-*  
7     *ties of daily living, that significantly benefit individ-*  
8     *uals with disabilities of all ages. Such devices and ad-*  
9     *aptations increase the involvement of such individuals*  
10    *in, and reduce expenditures associated with, programs*  
11    *and activities such as early intervention, education,*  
12    *rehabilitation and training, employment, residential*  
13    *living, independent living, and recreation programs*  
14    *and activities, and other aspects of daily living.*

15            *(5) All States have comprehensive statewide pro-*  
16    *grams of technology-related assistance. Federal sup-*  
17    *port for such programs should continue, strengthening*  
18    *the capacity of each State to assist individuals with*  
19    *disabilities of all ages with their assistive technology*  
20    *needs.*

21            *(6) Notwithstanding the efforts of such State pro-*  
22    *grams, there is still a lack of—*

23                    *(A) resources to pay for assistive technology*  
24                    *devices and assistive technology services;*

1           (B) trained personnel to assist individuals  
2           with disabilities to use such devices and services;

3           (C) information among targeted individuals  
4           about the availability and potential benefit of  
5           technology for individuals with disabilities;

6           (D) outreach to underrepresented popu-  
7           lations and rural populations;

8           (E) systems that ensure timely acquisition  
9           and delivery of assistive technology devices and  
10          assistive technology services;

11          (F) coordination among State human serv-  
12          ices programs, and between such programs and  
13          private entities, particularly with respect to  
14          transitions between such programs and entities;  
15          and

16          (G) capacity in such programs to provide  
17          the necessary technology-related assistance.

18          (7) In the current technological environment, the  
19          line of demarcation between assistive technology and  
20          mainstream technology is becoming ever more dif-  
21          ficult to draw.

22          (8) Many individuals with disabilities cannot  
23          access existing telecommunications and information  
24          technologies and are at risk of not being able to access  
25          developing technologies. The failure of Federal and

1     *State governments, hardware manufacturers, software*  
2     *designers, information systems managers, and tele-*  
3     *communications service providers to account for the*  
4     *specific needs of individuals with disabilities in the*  
5     *design, manufacture, and procurement of tele-*  
6     *communications and information technologies results*  
7     *in the exclusion of such individuals from the use of*  
8     *telecommunications and information technologies and*  
9     *results in unnecessary costs associated with the retro-*  
10    *fitting of devices and product systems.*

11           *(9) There are insufficient incentives for Federal*  
12    *contractors and other manufacturers of technology to*  
13    *address the application of technology advances to*  
14    *meet the needs of individuals with disabilities of all*  
15    *ages for assistive technology devices and assistive tech-*  
16    *nology services.*

17           *(10) The use of universal design principles re-*  
18    *duces the need for many specific kinds of assistive*  
19    *technology devices and assistive technology services by*  
20    *building in accommodations for individuals with dis-*  
21    *abilities before rather than after production. The use*  
22    *of universal design principles also increases the likeli-*  
23    *hood that products (including services) will be com-*  
24    *patible with existing assistive technologies. These*  
25    *principles are increasingly important to enhance ac-*

1      *cess to information technology, telecommunications,*  
2      *transportation, physical structures, and consumer*  
3      *products. There are insufficient incentives for com-*  
4      *mercial manufacturers to incorporate universal de-*  
5      *sign principles into the design and manufacturing of*  
6      *technology products, including devices of daily living,*  
7      *that could expand their immediate use by individuals*  
8      *with disabilities of all ages.*

9           *(11) There are insufficient incentives for com-*  
10      *mercial pursuit of the application of technology de-*  
11      *vices to meet the needs of individuals with disabil-*  
12      *ities, because of the perception that such individuals*  
13      *constitute a limited market.*

14          *(12) At the Federal level, the Federal Labora-*  
15      *tories, the National Aeronautics and Space Adminis-*  
16      *tration, and other similar entities do not recognize*  
17      *the value of, or commit resources on an ongoing basis*  
18      *to, technology transfer initiatives that would benefit,*  
19      *and especially increase the independence of, individ-*  
20      *uals with disabilities.*

21          *(13) At the Federal level, there is a lack of co-*  
22      *ordination among agencies that provide or pay for*  
23      *the provision of assistive technology devices and as-*  
24      *sistive technology services. In addition, the Federal*  
25      *Government does not provide adequate assistance and*

1 *information with respect to the quality and use of as-*  
 2 *sistive technology devices and assistive technology*  
 3 *services to targeted individuals.*

4 *(14) There are changes in the delivery of assist-*  
 5 *ive technology devices and assistive technology serv-*  
 6 *ices, including—*

7 *(A) the impact of the increased prevalence*  
 8 *of managed care entities as payors for assistive*  
 9 *technology devices and assistive technology serv-*  
 10 *ices;*

11 *(B) an increased focus on universal design;*

12 *(C) the increased importance of assistive*  
 13 *technology in employment, as more individuals*  
 14 *with disabilities move from public assistance to*  
 15 *work through training and on-the-job accom-*  
 16 *modations;*

17 *(D) the role and impact that new tech-*  
 18 *nologies have on how individuals with disabil-*  
 19 *ities will learn about, access, and participate in*  
 20 *programs or services that will affect their lives;*  
 21 *and*

22 *(E) the increased role that telecommuni-*  
 23 *cations play in education, employment, health*  
 24 *care, and social activities.*

25 *(b) PURPOSES.—The purposes of this Act are—*

1           (1) *to provide financial assistance to States to*  
2           *undertake activities that assist each State in main-*  
3           *taining and strengthening a permanent comprehen-*  
4           *sive statewide program of technology-related assist-*  
5           *ance, for individuals with disabilities of all ages, that*  
6           *is designed to—*

7                   (A) *increase the availability of, funding for,*  
8                   *access to, and provision of, assistive technology*  
9                   *devices and assistive technology services;*

10                  (B) *increase the active involvement of indi-*  
11                  *viduals with disabilities and their family mem-*  
12                  *bers, guardians, advocates, and authorized rep-*  
13                  *resentatives, in the maintenance, improvement,*  
14                  *and evaluation of such a program;*

15                  (C) *increase the involvement of individuals*  
16                  *with disabilities and, if appropriate, their fam-*  
17                  *ily members, guardians, advocates, and author-*  
18                  *ized representatives, in decisions related to the*  
19                  *provision of assistive technology devices and as-*  
20                  *sistive technology services;*

21                  (D) *increase the provision of outreach to*  
22                  *underrepresented populations and rural popu-*  
23                  *lations, to enable the 2 populations to enjoy the*  
24                  *benefits of activities carried out under this Act*  
25                  *to the same extent as other populations;*

1           (E) increase and promote coordination  
2 among State agencies, between State and local  
3 agencies, among local agencies, and between  
4 State and local agencies and private entities  
5 (such as managed care providers), that are in-  
6 volved or are eligible to be involved in carrying  
7 out activities under this Act;

8           (F)(i) increase the awareness of laws, regu-  
9 lations, policies, practices, procedures, and orga-  
10 nizational structures, that facilitate the avail-  
11 ability or provision of assistive technology de-  
12 vices and assistive technology services; and

13          (ii) facilitate the change of laws, regula-  
14 tions, policies, practices, procedures, and organi-  
15 zational structures, to obtain increased availabil-  
16 ity or provision of assistive technology devices  
17 and assistive technology services;

18          (G) increase the probability that individ-  
19 uals with disabilities of all ages will, to the ex-  
20 tent appropriate, be able to secure and maintain  
21 possession of assistive technology devices as such  
22 individuals make the transition between services  
23 offered by human service agencies or between set-  
24 tings of daily living (for example, between home  
25 and work);

1                   (H) enhance the skills and competencies of  
 2 individuals involved in providing assistive tech-  
 3 nology devices and assistive technology services;

4                   (I) increase awareness and knowledge of the  
 5 benefits of assistive technology devices and assist-  
 6 ive technology services among targeted individ-  
 7 uals;

8                   (J) increase the awareness of the needs of  
 9 individuals with disabilities of all ages for as-  
 10 sistive technology devices and for assistive tech-  
 11 nology services; and

12                   (K) increase the capacity of public agencies  
 13 and private entities to provide and pay for as-  
 14 sistive technology devices and assistive technology  
 15 services on a statewide basis for individuals with  
 16 disabilities of all ages;

17                   (2) to identify Federal policies that facilitate  
 18 payment for assistive technology devices and assistive  
 19 technology services, to identify those Federal policies  
 20 that impede such payment, and to eliminate inappro-  
 21 priate barriers to such payment; and

22                   (3) to enhance the ability of the Federal Govern-  
 23 ment to—

24                   (A) provide States with financial assistance  
 25 that supports—

1                   (i) information and public awareness  
 2                   programs relating to the provision of assist-  
 3                   ive technology devices and assistive tech-  
 4                   nology services;

5                   (ii) improved interagency and public-  
 6                   private coordination, especially through  
 7                   new and improved policies, that result in  
 8                   increased availability of assistive technology  
 9                   devices and assistive technology services;  
 10                  and

11                  (iii) technical assistance and training  
 12                  in the provision or use of assistive tech-  
 13                  nology devices and assistive technology serv-  
 14                  ices; and

15                  (B) fund national, regional, State, and  
 16                  local targeted initiatives that promote under-  
 17                  standing of and access to assistive technology de-  
 18                  vices and assistive technology services for tar-  
 19                  geted individuals.
